Re: FOIA #2016-05327

Dear Mr. Peck:

This letter is an interim response to the Freedom of Information Act request dated June 10, 2016, to the United States Office of Personnel Management (OPM). You requested, "Records, analysis, summaries, technical reports, or any other responsive materials regarding the network compromise of OPM systems, including initial incident April 16th, 2015 when two instances of mcutil.dll named malware were discovered. All communications from Jeff Wagner, director of security Operations for OPM, regarding this incident are requested. Invoices for services provided by CyTech to OPM during this event also requested. Assessments regarding access to, and exfiltration of, the Central Personnel Data File also explicitly requested."

In an effort to address the volume of FOIA requests received as efficiently as possible, OPM has decided to make publicly available a number of cybersecurity related documents by posting them at <https://www.opm.gov/information-management/freedom-of-information-act/#url=Cyber-Security-Records>. Please review the materials that have been posted. If after reviewing those, you determine that you require additional information, you may contact the Freedom of Information Act Requester Service Center at [foia@opm.gov](mailto:foia@opm.gov) to submit a narrowly tailored request.

Please note that, since this is not OPM's formal initial response, we are not providing you appeal rights at this time. In the event that you press forward with a request for additional materials, we will provide a formal initial response that includes appeal rights for any withheld agency records. Thank you for your patience and cooperation in this matter.

Sincerely,

Tiffany Ford  
Acting FOIA Officer
